Took a chance and really glad I didn't, this is a multi player warsim that brings a lot of new ideas to the table, Constantly being updated with major improvements weekly. the only thing missing is a good player Base, although games easy to organise on the discord. The devs are very active and fix any problems found within days. The game looks great and has a variety of game modes. with large maps and a variety of guns and customisable attachments. still in early access but definitely worth a purchase and with the rate it's improving definitely one that should be in your library.. a really amazing game even with the simple ideas here it does provide a nice challenge ,,the only down side for it that its somewhat over priced IMO. Beautiful visuals and music. Charming writing. Compelling zen gameplay. I felt relaxed but driven while trying to make constellations and certain star patterns. Anyone who likes sim games or visual novels should give this a try! You've gotta get this if you've ever wanted to feel like a court mage or an alchemist.. it doesnt work. DLC for this game are really interesting, adding more random stuff to do.

This game is fun but become complicated after some hours of playing ,overall its a great game for all the trading possibility and the sea battles.

Easy to handle , a lots of detailed ships , possibility to have lots of fleet for trading or batlle and possibility to set some "automatic trading road, exactly like you want them.

Nice graphic both on the map and during sea battle.

The diplomacy is well done, so you can directly trade some material with the other nations, ask anyone to start/stop doing war and things like that.

You need money to rules safety, and it's fun to make the mission, (better with the DLC).

Still having a lots of fun trying to get the achievment and playing the tactical sea battle.

9/10 - maybe waiting for a 2017 version ?. I have only played this game a few hours ...but I immediately demanded a refund. OH not a refund from this game....but a refund for any other game I purchased all year. THIS is the game you should all be playing. It was funny and very well done. An excellent Indie game full of charm, personality, and more♥♥♥♥♥♥ jokes than you can shake a bag of♥♥♥♥♥♥♥♥♥♥at. Why are you still reading this? Go buy this game now, uninstall Fortnite, and play Quiver♥♥♥♥♥♥s. game super glitchy. cant change sensitivity, or when you find an article and click to read it you can not leave it. fix your game people. I really enjoyed this series...excellent !!! . Hardcore, Grand Strategy title. No crashes 7.1 hours in but lots of fun. Not for the casuals, not for the feint hearted but if you like to feel like a commander thinking over and over again about supply problems and maneuvers on a huge map go for it. Youll get 100s of hours out of both campaigns. End turn times can be a bit long though.. Try It out! It's fun!

The Quest for the BIG KEY is a peculiar little game, something I would like to see more often nowadays.

Having no enemies and nothing that gives you an urge to rush, it goes really well for a relaxed evening. Not having to solve any complicated, constructed puzzles also helps.

As I was playing, I had several "Aha!-Moments", finding new passages or hints located throughout the levels, which was really fun and made me think about the potential these subtle things have.

In conclusion: please more of this. :). this game is very interesting, watching your enemy to fall off is very funny.. Ghouls. Funny little green ghouls. A very gofy looking Airline Management Simulator. Well put together and the mechanics played out quite nicely. While the game was not very extensive in terms of fleet modifications, the management piece has a lot of detail into it.

If you can mind the graphics style, then this game is quite good at what it represents!. Lion that can't even jump?What a trash game!. Cloudberry Kingdom is a nice game for people that consider Super Mario to be to easy. Although the controls and hitboxes are not as spot on as Super Meat Boy, and every now and then you'll be hating the game for cheap deaths (saws that miss you as model but do hit your hitbox etc). When you think of it this game for a large part is a rythem game, there is one way to solve a level, and in most cases waiting to analyse and obstacle isn't an option, you just have to flow through. The soundtrack is killer, different hero's provide variation. Overall I'd say a solid 7/10, it's good, but just not as tight in controls as Super Meat Boy.. I have only 7 minutes on record from 1 play + skipping the credits by closing it down after it had ended, it was very highly detailed but the ending kinda made me sad, its not your typical ending but the effects just weren't any good, the screaming didn't make sense and the blood covering your eyes partially wasn't so ok either, still well made for free. just a bad ending, writings wise too.. I can't believe these hacks have the gall to charge sixteen dollars for what is essentially an asset flip held together by baling wire and chewing gum. There's three levels and after the first one the game defaults from their custom Pentagon Scott HUD to the default Crysis one. It's a Crysis-shaped pool of explosive diahrrea. Don't buy it!
